

Massif is a water-based mineral micro-stone paint that offers a unique and natural appearance and is suitable for indoor and outdoor use. This ready-to-use product combines the simplicity of a single-component system with the versatility of a multi-component system, making it easy for anyone to work with.

The application of Massif consists of two layers. First, a recommended primer should be applied; you can choose between WallPrim Pro or OmniPrim Pro, depending on the substrate, and it should match the colour of Massif. The first layer, the scrape layer, is applied using a special Massif roller, then finished with the Marrakech Walls spatula to achieve a unique look. Followed by a second layer, referred to as the rye layer. This thin layer is applied with a specialized rubber Massif Spreader, allowing for subtle nuances in texture.

Massif is suitable for various surfaces, including interior and exterior walls, woodwork, plasterboard, and concrete. It can also be applied over previously painted surfaces. This product encourages creativity and is an ideal solution for transforming ordinary walls, tabletops, and kitchen counters into stylish and natural-looking features. You can give any space, whether interior or exterior, a personal touch with Massif.

This mineral stucco paint is highly durable and rugged, yet flexible, making surfaces resilient against external influences. For added protection and enhanced ease of maintenance, consider using Pure & Original Varnish Ultra Matte in either 1K or 2K formulations. To keep your Massif surfaces in top condition, use Massif Care, a maintenance soap made from natural oils. It effectively cleans while providing a protective barrier to keep dirt at bay, ensuring your surfaces stay clean longer.
